

## LHPC Institute CalAIM Learning Collaborative

### Session 5: Finalizing Model of Care Part 1 Submission

#### Discussion Questions

1. How far along is your plan in completing the Model of Care (MOC) for submission?
  - a. Are there specific questions or areas of the MOC that your plan finds particularly challenging or that require additional clarification?
    - i. How are other plans thinking about these areas of the MOC?
  - b. What does your plan need to be able to finalize your MOC submission?
  
2. What is your plan's thinking around the following MOC issues (see MOC Part 1 for reference):
  - a. How will your plan coordinate with Tribal partners, if applicable, and ensure sufficient and timely ECM provider access to American Indian ECM-eligible enrollees?
  - b. How will your plan coordinate with local government agencies (LGAs) providing targeted case management (TCM) to members to ensure these members do not receive duplicative TCM services?
  - c. How is your plan prioritizing engagement of county behavioral health staff/providers to serve as ECM providers for your ECM Adult Population of Focus with SMI or SUD?
    - i. Do these providers agree and are they capable of coordinating all services needed by the Populations of Focus (not just their behavioral health services)?
  - d. If your plan is currently operating a Health Homes Program, to what extent will your plan's staff serve as ECM providers and how are you approaching the MOC question about transitioning to contracts with community-based providers?
  - e. For each pre-approved ILOS, if your plan's ILOS provider network/capacity will not reasonably allow for countywide provision of ILOS to all eligible members at the time of implementation, how might you describe your plan's approach to expanding provider network/capacity over a three-year time frame?
  - f. Are there any other issues around the MOC that you would find helpful to discuss among the group?

3. Are there outstanding issues or questions for the June 22 DHCS/Manatt technical assistance session? LHPC will compile and submit to DHCS/Manatt in follow-up to this discussion.
